BRAND IDENTITY SYSTEM · V1.0

Robakeye

One identity for a pharmacy, a veterinary clinic and a supermarket under one roof in Ibadan. This guide covers the colours, type, logo, icons, imagery and voice that hold the three together, and the rules that let each one feel like itself.

FLAGSHIP	MODULES	ISSUED
Ologuneru, Ibadan	Pharmacy · Vet · Supermarket	October 2026

ROBAKEYE

Ask us about your health needs

00

Foundations

What the brand has to carry, and what changed from the original badge.

PH · PHARMACY

Clinical trust

Dispensing, counselling and over-the-counter care. The brand is at its most restrained here: navy, white space, plain language.

VT · VETERINARY

Warm care

Consultations, vaccinations and pet supplies at the Ologuneru flagship. Lavender leads, amber adds warmth.

SM · SUPERMARKET

Everyday energy

Groceries and household shopping. Amber leads, navy anchors, the tone gets louder and friendlier.

Refining the badge `original → v1.0`

ORIGINAL ARTWORK (198 × 184 PX JPEG)

REFINED PRIMARY LOGO (VECTOR)

ELEMENT	ORIGINAL	V1.0	WHY
Circle	Bright blue, sampled at #2F38EB	Kept, exact colour	It is the most recognisable part of the mark. It becomes Badge Blue.
House	Orange pentagon with a grey-lavender side wall	Kept, corners rounded, side wall set in Lavender	Rounding matches the 2px rounded icon style. The side wall gives the lavender a place in the logo.
Symbol inside	Mortar and pestle	Kept, redrawn geometrically, with a small white cross on the bowl	The mortar and pestle is the original's real symbol. The cross adds the medical reading the brief asks for without replacing it.
RPL	Handwritten script	Sora ExtraBold, outlined	Script falls apart below about 80 px. Geometric caps stay legible on signage and screens.
ROBAKEYE	White, on a blue band inside the house	Moved below the badge in Robakeye Navy	The band duplicated the wordmark and was unreadable under 120 px. Taking it out lets the badge work alone as an icon.
Tagline	Italic script	Work Sans Medium Italic	It keeps the italic warmth and adds legibility.

About the brief. The brief describes a navy circle and a cross inside the house. The supplied artwork has a bright blue circle and a mortar and pestle. This system follows the artwork, so existing signage and packaging stay recognisable. Navy is introduced as a separate primary colour taken from the pestle.

01

Colour palette

Badge Blue and Amber are sampled from the original file. The other colours are built to work with them and to pass contrast checks.

PRIMARY

Robakeye Navy

HEX	#1B1E6D
RGB	27 30 109
CMYK	75 72 0 57
Token	--rb-navy

Primary brand colour. Text, pharmacy CTAs, navbar, footer. Drawn from the pestle in the original badge.

Badge Blue

HEX	#2F38EB
RGB	47 56 235
CMYK	80 76 0 8
Token	--rb-blue

The logo circle, sampled from the original artwork. Logo, links, focus rings. Use in small areas.

Amber

HEX	#F19428
RGB	241 148 40
CMYK	0 39 83 5
Token	--rb-amber

The house, sampled from the original artwork. Supermarket surfaces, promotions, highlights. Always carries navy text.

Amber Deep

HEX	#A65800
RGB	166 88 0
CMYK	0 47 100 35
Token	--rb-amber-deep

Amber for text and thin lines on white, where plain Amber fails contrast.

SECONDARY

Lavender Mist

HEX	#F4F1FD
RGB	244 241 253
CMYK	4 5 0 1
Token	--rb-lavender-mist

Soft page backgrounds. The original badge sits on this field.

Lavender

HEX	#C8C1F1
RGB	200 193 241
CMYK	17 20 0 5
Token	--rb-lavender

Veterinary surfaces, borders, the house's side wall in the badge.

Lavender Deep

HEX	#5A4CB0
RGB	90 76 176
CMYK	49 57 0 31
Token	--rb-lavender-deep

Veterinary CTAs, headings and icons. Passes AA with white.

SEMANTIC

Success Green

HEX	#1E7F46
RGB	30 127 70
CMYK	76 0 45 50
Token	--rb-success

In stock, order confirmed, payment received.

Alert Red

HEX	#C62828
RGB	198 40 40
CMYK	0 80 80 22
Token	--rb-alert

Prescription-only warnings, errors, recalls. Never for sales.

NEUTRAL

Neutral 50

HEX	#FAFAFA
RGB	250 250 250
CMYK	0 0 0 2
Token	--rb-n50

App background, table stripes.

Neutral 200

HEX	#E4E4E9
RGB	228 228 233
CMYK	2 2 0 9
Token	--rb-n200

Dividers, input borders.

Neutral 400

HEX	#A0A0AA
RGB	160 160 170
CMYK	6 6 0 33
Token	--rb-n400

Disabled states and placeholder icons only. Fails as text.

Neutral 600

HEX	#5C5C66
RGB	92 92 102
CMYK	10 10 0 60
Token	--rb-n600

Secondary text, captions.

Neutral 900

HEX	#1A1A1A
RGB	26 26 26
CMYK	0 0 0 90
Token	--rb-n900

Long-form body text, receipts.

CMYK values are straight conversions from RGB and are a starting point. Before the first print run, ask your printer for a proof on the actual stock (coated or uncoated) and adjust. Badge Blue is outside most CMYK gamuts and will print slightly duller. Approve it against a physical proof, and record a Pantone match from your printer here once one is chosen.

Accessible pairings WCAG 2.2 contrast

SAMPLE	PAIR	RATIO	RESULT	USE
Aa	white on navy	14.45:1	AAA	Pharmacy CTA, navbar
Aa	white on blue	7.28:1	AAA	Links as buttons, focus
Aa	navy on amber	6.20:1	AA	Supermarket CTA
Aa	white on amber	2.33:1	Fail	Never: white on amber
Aa	amber-deep on white	5.23:1	AA	Amber text on white
Aa	white on lavender-deep	6.78:1	AA	Vet CTA
Aa	navy on lavender-mist	12.97:1	AAA	Vet body text
Aa	lavender-deep on lavender-mist	6.09:1	AA	Vet headings on mist
Aa	navy on lavender	8.50:1	AAA	Text on Lavender
Aa	success on white	5.02:1	AA	In-stock label
Aa	white on success	5.02:1	AA	Success button
Aa	alert on white	5.62:1	AA	Rx warning text
Aa	white on alert	5.62:1	AA	Error banner
Aa	n600 on white	6.61:1	AA	Captions
Aa	n400 on white	2.59:1	Fail	Never as text
Aa	blue on navy	1.99:1	Fail	Never: blue on navy

Amber always carries navy text. White on Amber fails contrast, so no button, price tag or badge may set white text on Amber. Use Amber Deep when amber-coloured text is needed on white.

02

Colour by module

Every module uses the same palette in different proportions. The ratio bars show roughly how much of a page each colour should cover.

PH · PHARMACY

Navy on white, lots of space

White · Navy · Badge Blue · Navy 50 · Amber

- Primary CTA: Navy fill, white label.
- Amber appears only on small promotional flags, never next to dosage or warnings.
- Alert Red is for prescription-only notices and safety warnings.

Paracetamol 500 mg tablets
Pack of 24 · Pain and fever
~~₦1,200~~ In stock

Amoxicillin 500 mg capsules
Prescription only
Bring or upload your prescription. A pharmacist reviews it before dispensing.

Ask a pharmacist | Upload prescription

VT · VETERINARY

Lavender with soft amber

Lavender Mist · White · Lavender Deep · Navy · Amber

- Primary CTA: Lavender Deep fill, white label.
- Amber appears as warm highlights: pet names, reminders, small illustrations.
- Headings use Lavender Deep. Body text stays Navy.

Annual vaccination
Dogs and cats · about 20 minutes
Reminder for Bingo

Adult dog food, 3 kg
~~₦9,800~~

Book a visit | Pet supplies

SM · SUPERMARKET

Amber-led, navy-anchored

White · Amber · Navy · Amber 50

- Primary CTA: Amber fill, navy label.
- Deals use amber chips with navy text. Never use Alert Red for sales: red is reserved for warnings.
- Prices are Work Sans Bold, tabular figures, in Navy.

Fresh tomatoes, 1 kg
Packed this morning
~~₦2,400~~ Weekend deal

Long-grain rice, 5 kg
~~₦11,500~~ In stock

Add to basket | Checkout

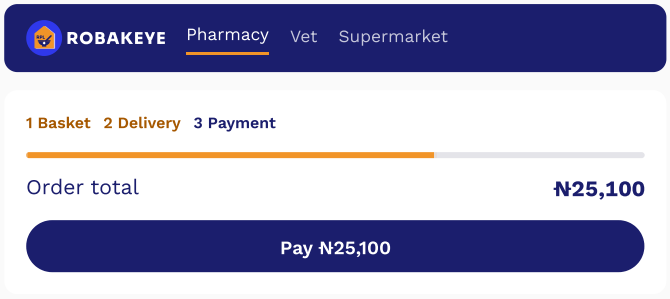

SHARED · NAVBAR, FOOTER, CHECKOUT

Navy and Amber

Navy White Amber

- Navbar and footer: Navy background, white text, Amber for the active item and cart count.
- Checkout: white page, Navy pay button, Amber step indicator. Payment is serious, so the Pharmacy palette leads here.
- Each module page keeps the shared navbar, so customers always know they are on Robakeye.

For developers. `brand/tokens.css` defines a theme for each module. Set `data-module="pharmacy"`, `"vet"`, `"supermarket"` or `"shared"` on a page or section, and components pick up `--rb-accent`, `--rb-on-accent` and `--rb-surface` automatically.

03

Typography

Sora for headlines, Work Sans for everything people read closely. Both are free on Google Fonts under the Open Font License.

HEADINGS · SORA

Aa Rr

SemiBold 600 **Bold 700** **ExtraBold 800**

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijkl mnopqrstuvwxyz 0123456789

Geometric and open. It matches the logo, which is drawn in Sora ExtraBold. Use it for headings, navigation, buttons and labels. ExtraBold is for hero headlines only.

BODY · WORK SANS

Aa ₦

Regular 400 **Medium 500** **SemiBold 600** **Bold 700**

Italic 500

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmn opqrstuvwxyz 0123456789 ₦ ẹ ọ ṣ Ẹ Ọ Ṣ à á è é

Highly legible at small sizes, with clear figures for dosages and prices. It includes the naira sign and Yoruba letters.

Sora has no ₦ and no Yoruba dot-below letters (ẹ, ọ, ṣ). Poppins, the other suggested heading font, has the same gap. We checked both font files directly. So the heading stack is `"Sora", "Work Sans", sans-serif` : if a stray ₦ or ẹ appears in a heading, the browser fills it in from Work Sans instead of a system font. Two rules follow from this. Set all prices in Work Sans Bold, including large ones. Set any heading written mainly in Yoruba entirely in Work Sans Bold, for example: **Ẹ kú àbọ̀ sí Robakeye**.

Type scale `base 16 px = 1 rem`

STYLE	SAMPLE	SIZE	LINE	WEIGHT · TRACKING
Display	**Ask us**	3.5rem · 56px	1.05	Sora 800 · −0.02em

H2	**Pet care at Ologuneru**	2.125rem · 34px	1.15	Sora 700 · −0.01em
H3	**This week's fresh produce**	1.625rem · 26px	1.2	Sora 600
H4	**How to take this medicine**	1.3125rem · 21px	1.3	Sora 600
H5	**Delivery details**	1.125rem · 18px	1.35	Sora 600
H6	**SIDE EFFECTS**	1rem · 16px	1.4	Sora 600 · +0.06em · caps
Body L	Take one tablet every 6 hours.	1.125rem · 18px	1.6	Work Sans 400
Body	Store below 25 °C, away from sunlight.	1rem · 16px	1.6	Work Sans 400
Small	Delivered within Ibadan	0.875rem · 14px	1.5	Work Sans 400
Caption	Batch no. and expiry are printed on the pack	0.75rem · 12px	1.4	Work Sans 500 · +0.02em
Price	**₦12,500**	scales with context	1.2	Work Sans 700 · tabular

On phones

- Display 2.5rem, H1 2.125rem, H2 1.75rem, H3 1.375rem.
- H4 and below stay the same size.
- Use `clamp()` between the two sizes.

Medical text

- Never smaller than 1rem (16px), including on labels and leaflets on screen.
- No italics and no all-caps for dosage or warnings.
- Put numbers and units in bold: **2 tablets**, **every 8 hours**.

Line length and spacing

- Keep reading text near 65 characters per line.
- Use sentence case for headings and buttons.
- Use letter-spacing only on caps labels.

04

Logo system

One badge, three lockups, two single-colour versions and a small-size icon. Every file is vector with outlined lettering, so no fonts are needed to open them.

Primary, stacked

Signage, packaging, documents, social profile banners.

`robakeye-primary.svg`

Horizontal with descriptor

Letterheads, invoices, vehicle livery, web footers.

`robakeye-horizontal.svg`

Horizontal, compact

The navbar and anything shorter than 48 px.

`robakeye-horizontal-compact.svg`

Reverse

Full-colour badge with white type, for Navy backgrounds.

`robakeye-horizontal-reverse.svg`

Badge

Social avatars, stickers, stamps, uniforms.

`robakeye-badge.svg`

Icon (favicon)

Below 64 px: no RPL, no cross, no side wall, heavier pestle.

`robakeye-icon.svg`

White-out

Dark photos, Navy or Badge Blue surfaces, one-colour screen print.

`robakeye-primary-white.svg`

Navy only

One-colour print, stamps, embossing. Print it in black for thermal receipts.

`robakeye-primary-navy.svg`

Navy on Amber

The only logo allowed on Amber: shop-front fascia, carrier bags, supermarket promotions.

`robakeye-horizontal-navy.svg`

Clear space and minimum size

Clear space

x = ¼ of the badge diameter. Keep at least x of empty space around every lockup, measured from the outer edge of the circle and the wordmark. Nothing else goes in that space: no text, photo edges or other logos.

VERSION	SCREEN	PRINT
Primary, stacked	120 px wide	30 mm wide
Horizontal with descriptor	220 px wide	50 mm wide
Horizontal, compact	28 px tall	8 mm tall
Badge	64 px	15 mm
Icon	16 px	6 mm

Do and don't

DO
Use the full-colour logo on White or Lavender Mist.

DO
Use the reverse or white-out version on Navy.

DO
Use the navy-only version on Amber.

DO
Switch to the icon below 64 px.

DON'T
Stretch or squash the logo.

DON'T
Recolour the badge or wordmark.

DON'T
Rotate it or add shadows, glows or bevels.

DON'T
Put navy type on Navy. Badge Blue on Navy has low contrast too.

DON'T
Put the full-colour logo on Amber. The house disappears.

DON'T
Rearrange the parts or retype the wordmark.

DON'T
Use the old JPEG. Use the SVG or the exported PNGs.

DON'T
Place it on busy patterns or photos without a clear area.

05

Iconography

Line icons on a 24 px grid, 2 px stroke, round caps and joins. The rounded corners echo the rounded house in the badge.

Canvas	24 × 24 px. Export at 24, 32 and 48 px.
Live area	20 × 20 px, leaving 2 px padding. Small details like caps and wheels may reach 1 px from the edge.
Stroke	2 px, centred, never scaled. Use 1.5 px at 16 px.
Corners	Round caps, round joins, 1 to 2 px corner radius on rectangles.
Fill	None. Use a soft tinted tile behind the icon for emphasis, not a filled glyph.
Colour	One colour, inherited from the text colour. Navy on light, white on Navy, Lavender Deep in Vet. Never Amber on white.

Pharmacy PH

Pill bottle

Capsule

Barcode

Price tag

Extending the set. Draw new icons on the same grid. Check them next to the cart and pill bottle at 24 px. If an icon needs a fill or a second colour to be understood, simplify it. The 12 icons here are in `brand/icons/` , one SVG file each.

06

Photography

Real people in real Robakeye spaces. Shoot at the Ologuneru flagship and around Ibadan, not with imported stock. Each module has its own light and mood.

PH · PHARMACY

Clean, bright, clinical

LIGHT

Bright, even daylight (5000 to 5600 K). High key, soft shadows, white backgrounds.

PEOPLE

Nigerian pharmacists of different ages and genders, in white coats with navy name badges. Customers being counselled at eye level across the counter.

SHOT LIST

Counselling at the counter · a pharmacist checking a prescription · neat shelf fronts · single products on a white sweep · hands passing a labelled bag

AVOID

Spilled pills, needles in close-up, anyone who looks unwell or distressed, readable prescriptions or patient names, foreign stock settings.

VT · VETERINARY

Warm, candid, close

LIGHT

Warm window light (about 4000 K), shallow depth of field, natural skin and fur tones.

PEOPLE

Owners with their pets and Robakeye vet staff in lavender scrubs, inside the Ologuneru flagship. Shoot at the animal's eye level.

SHOT LIST

A vet greeting a dog in the waiting area · a child holding a cat on the consult table · a puppy's first visit · supplies aisle with an owner choosing food

AVOID

Surgery, blood, needles going in, frightened or restrained animals, staged studio pets.

SM · SUPERMARKET

Vibrant, full, local

LIGHT

Bright and saturated, with no colour cast from shop lighting. Correct to neutral white, then lift warmth slightly.

PEOPLE

Ibadan shoppers: families, students and traders, in everyday clothes. Show real moments like weighing produce or chatting at the till.

SHOT LIST

Full produce displays (tomatoes, peppers, yam, plantain) · overhead basket flat-lays · staff restocking · a shopper at checkout with a branded bag

AVOID

Empty or messy shelves, handwritten price stickers in frame, price claims baked into photos.

Consent

- Get a signed model release from everyone identifiable.
- For children, a parent or guardian signs.
- Pet photos need the owner's permission.
- Never photograph a customer's prescription, medicine bag label or screen.

Treatment

- Use the module's grading targets above. Skin tones must look natural; never lighten them.
- No heavy filters, vignettes or duotones on people.
- A navy overlay at 60% is allowed behind white headlines.

Crops

- Hero banners: 16:9 on desktop, 4:5 on mobile. Keep subjects out of the left half so headlines can sit there.
- Product images: 1:1 on white, product filling 80% of the frame.

07

Voice and tone

One voice, three moods. Robakeye always sounds like a knowledgeable neighbour: helpful, plain-spoken and never pushy.

PH · PHARMACY

Reassuring **Authoritative** **Clear**

Short sentences, exact numbers, no jargon without an explanation. Point people to the pharmacist whenever a question has a personal answer.

SAY
Not sure two medicines are safe together? Ask our pharmacist before you take them.

SAY
Take 1 tablet every 8 hours, after food. Do not take more than 3 in 24 hours.

DON'T SAY
~~Guaranteed cure for malaria in 24 hours!~~

DON'T SAY
~~Just pop 2 and you go dey alright.~~

VT · VETERINARY

Friendly **Caring** **Approachable**

Speak to the owner and use the pet's name. Be gentle about health worries and clear about next steps.

SAY
Bingo's yearly shots are due. Book a time that suits you and we'll keep it calm and quick.

SAY
New puppy? Bring them in for a first check-up and we'll talk you through feeding and vaccines.

DON'T SAY
~~Your pet is at risk! Book now before it's too late!~~

SM · SUPERMARKET

Energetic **Value-driven** **Welcoming**

Lead with what's fresh and what's good value. This is where warm Nigerian colloquial touches belong.

SAY
Fresh tomatoes just landed. Come and pick the best before Saturday!

SAY
Ẹ kú àbọ̀! Your weekly basket, sorted in one stop.

DON'T SAY
~~LOWEST PRICES IN NIGERIA!!!~~

Bilingual and local language rules

CONTEXT	ENGLISH	YORUBA, PIDGIN, COLLOQUIAL
Supermarket ads, social posts, in-store signs	Primary	Welcome. Greetings (Ẹ kú àbọ̀, Ẹ ṣé), light Pidgin and local references.
Vet marketing, reminders	Primary	Greetings and warmth only. Keep care instructions in plain English.
Pharmacy marketing	Primary	Greetings only.
Medical content: dosage, warnings, labels, leaflets, prescriptions, consult notes	Always	Never. If a translation is needed, use a full professional translation checked by a pharmacist, not a colloquial paraphrase.
Receipts, invoices, legal and payment text	Always	Never.

Write it right

- Always write Yoruba with its tone marks and dot-below letters (Ẹ kú àbọ̀, not "E ku abo").
- Have a native speaker check any Yoruba copy before it is printed.
- Write prices as ₦12,500. Don't use N12,500 or NGN in customer copy.

Health claims

- Never promise a cure or a result.
- Do not advertise prescription-only medicines to the public. Talk about the service ("Our pharmacist can review your prescription").
- Have pharmacy advertising checked against current NAFDAC and PCN rules.

House style

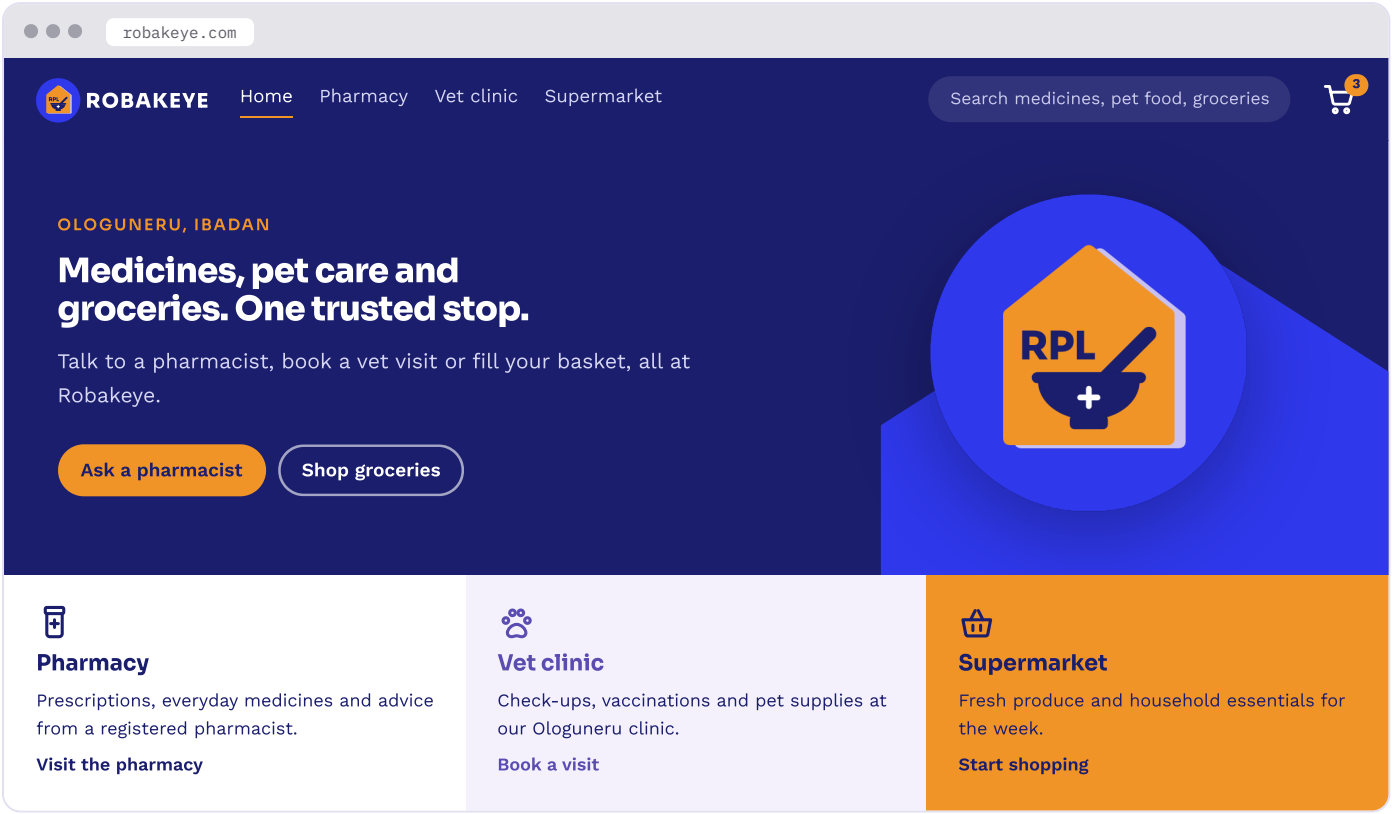

- Robakeye in running text, ROBAKEYE only in the logo.
- Sentence case for headings and buttons.
- Write "the vet clinic", "the pharmacy", "the supermarket" in lower case.
- Keep exclamation marks for the supermarket, and use at most one.

08

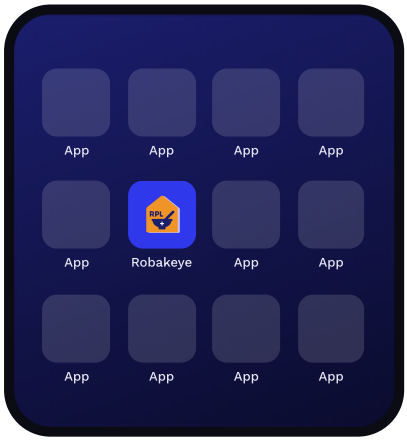

Applications

How the system looks on the things people actually see. All names, numbers and prices below are samples.

Homepage hero `shared module · desktop`

Mobile app icon

- Supply a full-bleed square in Badge Blue. iOS and Android apply their own rounded mask.
- The house sits inside the central 66% so Android adaptive masks never cut it.
- Browser favicons use the simplified icon, without RPL.

Delivery bike livery

Livery rules

- Top box in Amber, with the badge and wordmark on both sides and the back. The navy band carries the tagline.
- Make the navy band reflective vinyl so the bike is visible at night.
- Bike body panels in Navy with one amber stripe. No other graphics, phone numbers or prices.
- Rider kit: navy jacket, amber reflective vest marked ROBAKEYE DELIVERY, and helmet.

Temperature-controlled box

Insulin, vaccines and other cold-chain medicines travel in a separate Navy box with a Lavender label reading "Pharmacy · Keep cool · Keep upright". The navy box tells staff and customers it is a pharmacy delivery at a glance.

Staff uniforms and ID badges

Pharmacy
White coat, navy collar and cuffs.

Vet clinic
Lavender scrubs, Lavender Deep trim.

Supermarket
Amber polo, navy collar, wordmark across the back hem.

ID cards are CR80 size (54 × 85.6 mm), portrait, with a slot punch at the top. The bottom stripe shows the module colour, so customers can tell who to ask from across the shop. Pharmacists show their PCN registration number and vets their VCN number. Staff ID prefixes follow the module codes: `RPL-PH`, `RPL-VT`, `RPL-SM`. `SAMPLE PEOPLE`

Rules for paper

- Thermal receipts print in black only. Use the single-colour badge and wordmark, never the colour artwork, which prints as grey mush.
- Set receipt text in Work Sans with tabular figures so prices line up. Most thermal printers need the header as a 1-bit bitmap: export it from `robakeye-primary-navy.svg` at 576 px wide in pure black.
- Mark pharmacy lines on mixed receipts with "PH item" and the dispensing pharmacist.
- A4 invoices use the horizontal logo, a Navy and Amber rule, and Navy text.

This guide, A4

Before this goes to print

1. Confirm the circle colour with the owner. This system keeps the bright Badge Blue from the artwork rather than the navy circle described in the brief.
2. Get a printed proof of Badge Blue and Amber on your actual stock, and record the Pantone matches from your printer in this guide.
3. Find out what RPL stands for and whether it should stay in the mark. It is kept for continuity, and the icon version already drops it.
4. Have a native speaker check all Yoruba copy, and have a pharmacist check pharmacy advertising rules before launch.
5. Book a shoot at the Ologuneru flagship using the shot lists in section 06, with signed releases.
